# What is Tuition Deregulation?

- Tuition “deregulation” transferred the authority to set tuition rates from the Texas Legislature to university regents and administrators.

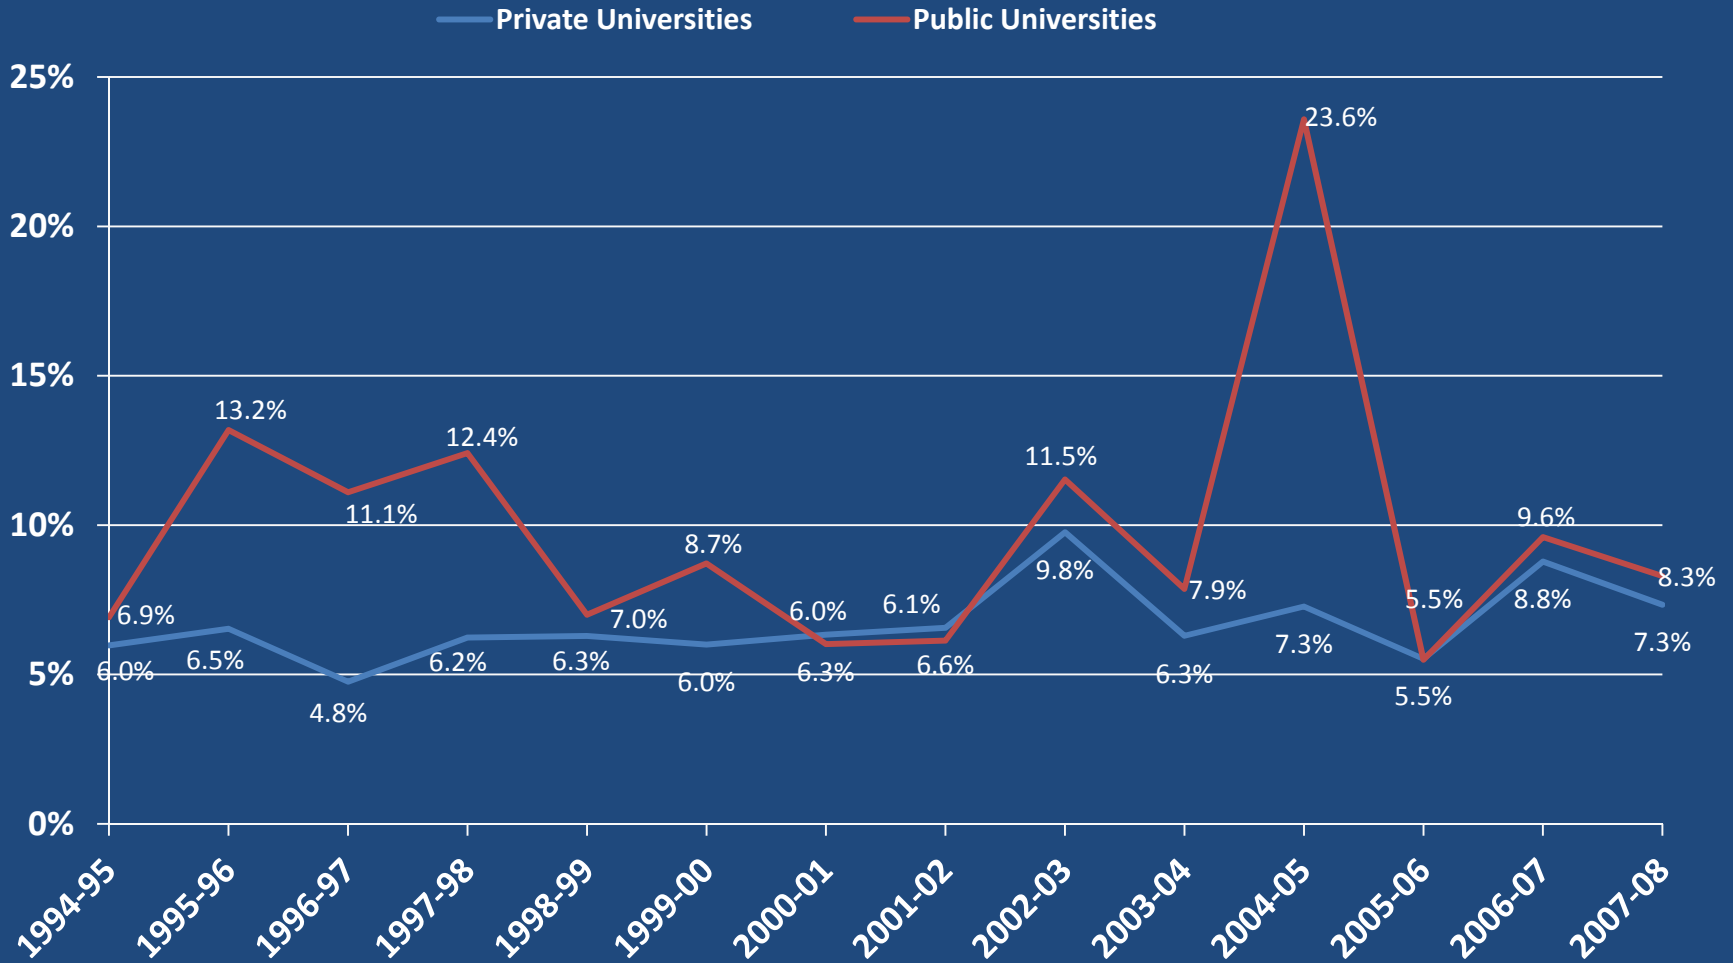

# The History of Dereg

- 2003 budget shortfall
- No new taxes!
- Universities support the policy
- Arguments for and against
- HB 3015

# Key Findings

- Tuition deregulation has:
  - reduced the incentive for Texas universities to keep spending under control
  - shifted some higher education costs from taxpayers to students
  - exposed the lack of price competition in higher education
  - not significantly reduced the *long-term pressure* on state appropriations for higher education.

# Recommendations

- Improve transparency and accountability
  - Place detailed check registers online
  - Create an annual report that measures the value added by each university and the value added per state and student dollar spent.
  - Identify universities that have administrative expenses disproportionate to their enrollment and require submission and adoption of a plan to control administrative costs
  - Study the feasibility, pros, and cons of placing universities under sunset review
- Shift to student-centered funding
- Separate research and teaching budgets
