

Testimony

Testimony Before the House Committee on Pensions in Support of SB 151

by James Quintero, Director

Chairman Flynn and Members of the Committee:

My name is James Quintero, and I am the director of the Center for Local Governance at the Texas Public Policy Foundation, a free-market research institute based in Austin, Texas. Thank you for taking the time today to discuss Senate Bill 151, a bill to require voter approval for the issuance of pension obligation bonds (POBs). I am testifying in support of the bill.

Pension obligations bonds are a financial instrument used by some state and local governments to fund all or part of a plan's unfunded liability through borrowing. Proceeds from issuance of the bond are invested, through the pension fund, with the intent of realizing higher investment returns than otherwise possible using only contributions. As you can imagine, there is a degree of risk associated with using these instruments.

In a January 2015 article titled [Pension Obligation Bonds](#), the Government Finance Officers Association, a non-profit professional organization, highlighted these risks, cautioning state and local governments that:

1. The invested POB proceeds might fail to earn more than the interest rate owed over the term of the bonds, leading to increased overall liabilities for the government.
2. POBs are complex instruments that carry considerable risk. POB structures may incorporate the use of guaranteed investment contracts, swaps, or derivatives, which must be intensively scrutinized as these embedded products can introduce counterparty risk, credit risk, and interest rate risk.
3. Issuing taxable debt to fund the pension liability increases the jurisdiction's bonded debt burden and potentially uses up debt capacity that could be used for other purposes. In addition, taxable debt is typically issued without call options or with "make-whole" calls, which can make it more difficult and costly to refund or restructure than traditional tax-exempt debt.
4. POBs are frequently structured in a manner that defers the principal payments or extends repayment over a period longer than the actual amortization period, thereby increasing the sponsor's overall costs.
5. Rating agencies may not view the proposed issuance of POBs as credit positive, particularly if the issuance is not part of a more comprehensive plan to address pension funding shortfalls.

Similar concerns were expressed by Moody's Investor Services who, in a December 2012 article titled "[Moody's: Pension Funding Bonds Bring Risk to State and Local Governments](#)" commented that: "...pension bonds are often a red flag associated with greater rigidity of long term obligations, failure to find sustainable solutions to pension funding and a pattern of pushing costs off into the future. For this reason, most pension bonds have, at best, a neutral impact on our overall assessment of an issuer's credit quality."

In Texas, concerns about POBs are heightened because this instrument can be used without voter approval.

Currently, POBs are the only type of general obligation bond allowed to be issued without the public's input. This means that governments can expose the public to financial risk without allowing them a voice in the process.

Since these instruments were created in the early 2000s, Texas' local governments have issued POBs totaling more than \$1.2 billion without voter approval. Outstanding pension obligation bonds held by Texas governments include:

Voters need to be included in this conversation, especially since taxpayers could be obligated for full repayment if those bonds fail to perform as expected. For this reason, the Foundation supports the passage of Senate Bill 151.

Thank you for your time. I look forward to answering any questions that you may have.

About the Texas Public Policy Foundation

The Texas Public Policy Foundation is a 501(c)3 non-profit, non-partisan research institute. The Foundation's mission is to promote and defend liberty, personal responsibility, and free enterprise in Texas and the nation by educating and affecting policymakers and the Texas public policy debate with academically sound research and outreach.

Funded by thousands of individuals, foundations, and corporations, the Foundation does not accept government funds or contributions to influence the outcomes of its research.
