Texas' Potential Economic Challenges

- Lower oil prices: But more diversified economy
 - 1980s: 21% of real private economy; 5% of labor force
 - Today: ~10% of real private economy; ~2% of labor force
- More diversification from market activity, [NAFTA](#), pro-growth policies
- Federal cuts in taxes & regs support growth
- Slower global growth & federal government policies may be impediments

Fiscal Prospects Support Opportunity

 - 2003: Dealt with a \$10 B shortfall and passed a CTB but massive budget increase in 2005

- Until...
 - 2015: Passed potential 2016-17 CTB, provided tax relief, and left money on the table
 - 2017: Sustained 2016-17 CTB, passed potential 2018-19 CTB, and did not raise major taxes or fees
